

Author Index

- Aprilia Ode Saadia, “Expert System of Error Tracking Automated Weather Observing System Using Certainty Factor Method Based on Android Application”, 12(1): 27-36
- Budiman, “Optimization of Human Development Index in Indonesia Using Decision Tree C4.5, Support Vector Machine Algorithm, K-Nearest Neighbors, Naïve Bayes, and Extreme Gradient Boosting”, 12(1): 15-26
- Budiman, “Digital Marketing Strategy Optimization Using Support Vector Machine Algorithm ”, 12(1): 57-67
- Erna Nurmawati, , “Predicting Stock Price Movements with Technical, Fundamental, and Sentiment Analysis Using the LSTM Model”, 12(1): 1-9
- Halis M Djibran, “Expert System of Error Tracking Automated Weather Observing System Using Certainty Factor Method Based on Android Application”, 12(1): 27-36
- Harlinda, “Data Mining Approach to Improve Minimarket Sales using Association Rule Method”, 12(1):10-14
- Hasria, “Expert System of Error Tracking Automated Weather Observing System Using Certainty Factor Method Based on Android Application”, 12(1): 27-36
- Ihsan AlFauzi, “Digital Marketing Strategy Optimization Using Support Vector Machine Algorithm ”, 12(1): 57-67
- Ilham Ramadhan, “Optimization of Human Development Index in Indonesia Using Decision Tree C4.5, Support Vector Machine Algorithm, K-Nearest Neighbors, Naïve Bayes, and Extreme Gradient Boosting”, 12(1): 15-26
- Joshua Purba, “Expert System of Error Tracking Automated Weather Observing System Using Certainty Factor Method Based on Android Application”, 12(1): 27-36
- La Ode Restele, “Expert System of Error Tracking Automated Weather Observing System Using Certainty Factor Method Based on Android Application”, 12(1): 27-36
- Muhamad Taufiq Hidayat, “Optimizing Sentiment Analysis on the Linux Desktop Using N-Gram Features”, 12(1): 37-45
- Muhammad Ighfar Saputra, “Predicting Stock Price Movements with Technical, Fundamental, and Sentiment Analysis Using the LSTM Model”, 12(1): 1-9
- Nisa Pirsingki, “Sentiment Analysis of #Saverafah Hashtag on TikTok Using Naive Bayes and Decision Tree Methods”, 12(1): 46-56
- Nur Alamsyah, “Optimization of Human Development Index in Indonesia Using Decision Tree C4.5, Support Vector Machine Algorithm, K-Nearest Neighbors, Naïve Bayes, and Extreme Gradient Boosting”, 12(1): 15-26
- Nur Alamsyah, “Digital Marketing Strategy Optimization Using Support Vector Machine Algorithm ”, 12(1): 57-67
- Ramdan Satra, “Data Mining Approach to Improve Minimarket Sales using Association Rule Method”, 12(1):10-14
- Rayhan Abyasa, “Predicting Stock Price Movements with Technical, Fundamental, and Sentiment Analysis Using the LSTM Model”, 12(1): 1-9
- Rizky Wandri, “Sentiment Analysis of #Saverafah Hashtag on TikTok Using Naive Bayes and Decision Tree Methods”, 12(1): 46-56

Rudi Kurniawan, “*Optimizing Sentiment Analysis on the Linux Desktop Using N-Gram Features*”, 12(1): 37-45

Tati Suprpti, “*Optimizing Sentiment Analysis on the Linux Desktop Using N-Gram Features*”, 12(1): 37-45
